CPI is an international training organization committed to best practices and safe behavior management methods that focus on prevention. By using *Nonviolent Crisis Intervention® training* as part of a comprehensive crisis prevention and intervention plan, you can learn how to defuse challenging and disruptive behavior before an incident escalates to a crisis situation. Successful implementation leads to a change in school culture, a change in adult professional behavior, and a change in staff relationships with both students and stakeholders. These changes offer many benefits to your staff, your organization, and the students you serve. Participants completing the program will be able to provide training to their district staff/personnel.
