

Region One Online Customize your Teaching

24/7 Accessibility

Flexibility becomes essential for educators, so having access to online courses at any time and from anywhere facilitates online accessibility

Interactive Assessments

Active learning helps to keep the learner focused and attentive. Interactive activities and assessments are an integral part of each online course.

Self-Paced Courses

Learning happens at a different rate. Being able to Manage our own learning time is a key element to experience success and to motivate the learner.

Certification Pathways

A growth mindset differentiates the learning process and leads the path to successfully acquiring new information. Our online courses are organized into pathways that certifies a comprehensive knowledge.

Diverse Topics

OmniSuite Online Learning offers a variety of topics that focus on audience diversity, from the classroom to administration as well as from technology to school business operations.

Every school district and every department within a school district have specific information, trainings, or content knowledge to share. Why not sharing them online by *customizing your teaching?*

The e-Learning department at Region One offers the possibility to create unique and specific online courses for your district. By customizing your online courses, your district is targeting all different learning style, making learning interactive, engaging and transformative.
