Unlock the twenty-first century for students

The Lucid for Education visual learning platform allows students to be creative and collaborate with peers and educators in real-time to develop twenty-first century skills in the classroom.

Learn,
the twenty-first century way

Teach,
the twenty-first century way

Critical Thinking:

Students can engage with problems in their own way, making associations between different subjects & disciplines.

Communication:

Students have a powerful way they can share their thoughts, questions, and solutions visually.

Creativity:

Students are encouraged to create not just consume.

Collaboration:

Students can work together on an activity in real time, perfect for putting talent and expertise of students to work.

Collaborative:

Lucid for Education allows collaboration between teachers & students. Creating digital resources, presentations, and projects together with other educators and students making classroom activities resemble the real world.

Intuitive:

Lucid for Education is ready to go the moment a teacher or student logs in. The template creation tool makes engaging lessons simple to create and distribute.

Versatile:

Lucid for Education has integrations with GSuite, Google Classroom and top LMS providers. It's compatible with any operating system and any device.
