Leveraging Partnerships to Support College, Career and Life Readiness

Day 6- (June 18, 2020)- Parents as Partners in the College-Going

Process

All sessions are from 10:00-11:15 am

**Earn up
to 7.5 CPE
Hours**

Fee:

\$200 for all 6 sessions

SESSION DESCRIPTIONS

College and Career Readiness: A Common Understanding

Presenter: Melissa I. Lopez

Join the Region One Office of College, Career and Life Readiness as they provide an overview into Texas' vision for preparing all students for college and career. The participants will engage in discussion regarding current college and career readiness efforts; how the efforts are reflected in the CCMR Accountability System; and CCMR funding implications under House Bill 3.

The Missing Key to Student Success: Social and Emotional Learning

Presenters: Norma O. McCormick and Nicole Saenz

Preparing students for college, career and life readiness requires consideration and development of the student as a whole. Social and Emotional skills are the key that has been missing in students' toolkit for success. In this presentation, participants will develop an understanding of social and emotional skills, review a summary of key research on the impact of SEL, and explore targeted implementation and integration of social and emotional learning in schools. Rubrics and examples of activities will be provided to the audience.

Post-Secondary Success for All: Building Support for Students with Disabilities

Presenters: Vanessa Salazar and Ricardo Lee Lopez, Jr.

Researchers regard transition from high school to college as one of the most stressful events for adolescents. Compound that statistic with additional stressors and this life-changing event is even more challenging for students with disabilities. In this interactive session, we will explore research-based concepts that will promote successful transition from high school to post-secondary success for students with disabilities. Through the exploration of real-world scenarios and first-hand accounts, we will delve into best practices to create a culture of successful transition for all.

Paying for College: Show Me the Money!

Presenters: Angela Delamar and The Deep South Texas Financial Literacy Alliance

This webinar will provide an overview of the financial aid process including understanding college costs, calculating return on investment, and revealing the process to finance college. We will also showcase financial aid resources that can be utilized both face-to-face and in remote learning environments.

Everything is Better When We Work Together: Leveraging Partnerships to Support College and Career Readiness

Presenters: Dr. Eliza Alvarado and Melissa I. Lopez

Recognized nationally for their partnership efforts, Region One ESC has collaborated with the private and public sector to afford opportunities that would otherwise not be available to underrepresented students. Learn how the collaboration among education, business, community and government agencies can help address the educational, financial, college and career readiness needs of students and their families.

Parents as Partners in the College-Going Process

Presenters: Ricardo Lee Lopez, Jr. and Sylvia Vargas

We know the college going experience can be overly stressful and complicated for students, but how often do we consider how that experience affects parents? Parents play an important role in their children's education as they go through public school; however, once the post-secondary process begins, many struggle to navigate everything from the application process to financial aid. They still want to be involved and engaged, but are sometimes unaware of the best steps to take. Join the Office of College, Career, and Life Readiness for a session on how to develop partnerships with parents in an effort to assist campus staff in preparing students as they plan for the transition to college.
