

Performance Based Monitoring Analysis System

PBMAS 101

Background:

Performance-Based Monitoring Analysis System (PBMAS) is an automated data system that reports annually the performance of school districts and charter schools in selected program areas (bilingual education/English as a second language, career and technical education, special education, and certain Title programs under the No Child Left Behind Act). From the data contained in the PBMAS, PBM staff produces annual PBMAS district reports. These reports, produced in 2016 as in previous years, include specific district-level data for each performance indicator in the PBMAS.

Session Outcomes:

- ◆ Enhance your understanding of PBMAS
- ◆ Delve into an overview of requirements and processes for the Texas Accountability Intervention System (TAIS)
- ◆ Learn about tools and resources to support your work
- ◆ Consider what the intervention process as a means to move toward collaborative, continuous, sustained improvement

November 28, 2016
