

Six Levers Simplify English Language Learning

How to Simplify Instruction for English Language Learners Every Day

Effective ELL instruction uses high-impact tools that blend proficiency objectives with hands-on, real-world activities. In one short day, we'll show you how to simplify instruction using the LoTi and H.E.A.T. metrics to close the ELL achievement gap.

Part of the secret is using THE ELL LEVERS

Our 6 ELL Levers help educators identify gaps in support while prioritizing collaborative, self-directed activities and personalized learning for their English Learners. By focusing on the context of social interactions and learner questioning, students explore content more deeply and connect the learning to their everyday lives.

This powerful, one-day session introduces a framework that consolidates strategies for English Learners while inspiring a fresh and innovative approach for turning up the H.E.A.T. on student learning, increasing the Level of Teaching Innovation (LoTi), and closing the ELL achievement gap.

Who is this course best for?

ADMINISTRATORS

Immediately launch a coaching and feedback cycle that promotes growth and learning

ESL/BILINGUAL STAFF

Apply our ELL Levers to close the achievement gap among English Language Learners

CURRICULUM STAFF

Use evidence-based practices to build confidence and impact student achievement

Schedule a workshop on location for only \$150/person
