

Welcome Dyslexia

Coordinators!

HB 1886 Updates

ROEL GARZA

EARLY LITERACY SPECIALIST/DYSLEXIA

REGION ONE ESC

HB 1886

•85th Texas Legislature, Regular Session, 2017, identified requirements for the screening or testing of all students enrolling in Texas public schools for dyslexia and related disorders.

•Signed by the Governor on June 15, 2017

•Effective immediately June 15, 2017

HB 1886 - Dyslexia

- •Dyslexia is widely accepted to be one of the most common learning disabilities. Studies indicate the prevalence of dyslexia in school aged children is between five and seventeen percent.
- Early identification and intervention improve a child's academic success.
- •Many children miss early opportunities for assistance due to not being identified soon enough.
- •HB 1886 provides for the early identification and intervention for a child with dyslexia to improve the child's academic success.
- •ALL students enrolled in Texas public schools will be screened or tested, as appropriate, for dyslexia and related disorders at the end of the kindergarten and first grade school years.

TEC 28.006

Texas Dyslexia Handbook Revised 2014 - Chapter 2 / Page 15

Figure 2.1. State and Federal Laws

Reading Diagnosis—TEC §28.006

This education code requires schools to administer early reading instruments to all students in kindergarten and grades 1 and 2 to assess their reading development and comprehension. Additionally, the law requires a reading instrument from the Commissioner's approved list be administered at the beginning of grade 7 to any student who did not demonstrate proficiency on the reading assessment administered under TEC §39.023(a). If, on the basis of the reading instrument results, students are determined to be at risk for dyslexia or other reading difficulties, the school must notify the students' parents/guardians. According to TEC §28.006(g), the school must also implement an accelerated (intensive) reading program that appropriately addresses the students' reading difficulties and enables them to catch up with their typically performing peers.

HB 1886 Passed

Education Service Centers Core Group

AGENDA November 14-15, 2017

Hotel Indigo -Mezzanine floor

Tuesday, November 14, 2017

10:00 AM - 5:00 P.M.

Welcome and Review of Agenda

Laura Strube, Region 15

- · Regions 2, 3, and 4 provided updates of recovery efforts for hurricane stricken areas
- · Expressed concerns and frustrations of school system leadership with FEMA supports
- · Lack of housing for families and educators
- Region 20 shared impact of shooting on three school districts. Importance of crisis team at each ESC.

Academy Updates / Etc.

Monica Martinez, TEA

- Reading Academy for upcoming academic year is on hold at this time due to integration of additional Governor's Reading priorities.
- . Dyslexia handbooks are still available for interested ESCs
- Expanded listing of prioritization campuses moving forward will include an entire list for
 possible expansion to serve campuses beyond highest prioritization campuses that have
 already been served. Listing may not be available until late Spring, however, if advance,
 planning is needed then utilize prior year's listing.
- Social Studies Streamlining:
 - First workgroup scheduled for end of January regarding Social Studies streamlining.
- SBOE
 - o Proposed revisions to HS graduation requirements
 - Specifically how Computer Science courses should be credited
 - Satisfy LOE and Math requirements
 - One CS course satisfies two credit requirements (LOE + Math)
 - Recommendation is to review graduation requirement proposed rule changes
- Dyslexia HB 1886 Additional guidance to be provided by SBOE
 - Dyslexia specialists at ESCs
 - Dyslexia screening for EC
 - o Any changes applicable for 2018-2019 school year

Clarification

Guidance

HB 1886

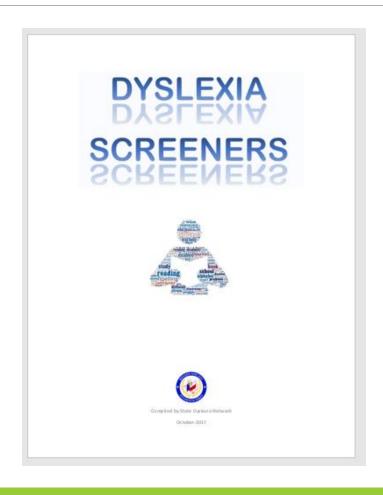

- •TEA will NOT provide a list of APPROVED screeners
- •LEA Conversation decision as to which screener to administer
- •LEA Conversation review assessments that you are already using/administering in Kinder and 1st grade
- Example: TPRI
- Texas Dyslexia Handbook (Program by Statue)

Texas Dyslexia Handbook P. 10

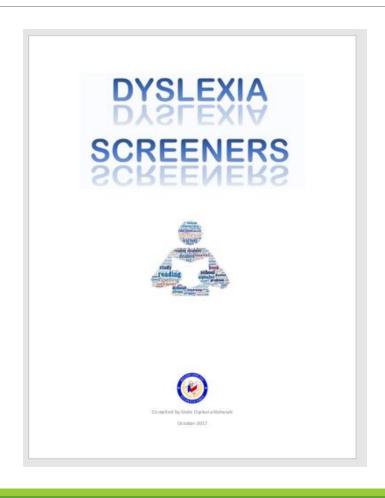

Common Risk Factors Associated with Dyslexia for Kindergaten and 1st Grade:

- •Difficulty in Phonemic Awareness (Segmenting and blending individual phonemes) K-1
- •Difficulty in Phonemic Awareness (Manipulating phonemes) 1st
- Difficulty learning Letter Names K-1
- Difficulty learning Letter Sounds K-1
- Difficulty reading words in isolation K-1
- Difficulty spelling words K-1

Dyslexia Screeners

THIS IS **NOT** AN APPROVED LIST OF SCREENERS

HB 1886

•LEA Conversation – referencing the state dyslexia handbook/district dyslexia handbook as to process to follow after the screener

Things to consider:

- >At-risk characteristics in a screener does not necessarily mean formal assessment
- Consider the circumstances of each individual student, grade level, RTI, family history

Data Collection

- •Legislature holds "statutory authority" on all state laws that are passed
- •TEA did not receive a directive from the legislature for a data collection for HB 1886
- •No data collection scheduled by TEA for "Dyslexia Screening" at this time
- **H.B. 1886** <u>requires</u> that students enrolled in Texas public schools be screened or tested, as appropriate, for dyslexia and related disorders at the end of the kindergarten and first grade school years.

S.B.O.E.

•Next meeting January-2018

•HB 1886 is on the agenda

•The guidance and clarification will probably not go into effect until the 2018-2019 school year

T.E.A.

- •HB 1886 was passed for the right reasons:
 - ➤ Early Identification
 - ➤ Early Intervention
 - ➤ To better serve students
- Additional guidance and clarification is needed
- In 2019-Legislature

HB 1886: Early Screener for Dyslexia and Related Disorders

Kindergarten and Grade 1 Students

Campus I	lame:
Campus (Contact Name & Title:
I.	Have your teachers been trained in Dyslexia and Related Disorders? Yes or No If no, describe your action plan to train staff:
II.	Did you screen all Kindergarten and Grade 1 students for dyslexia? Yes or No
	Name of Screener:
	If no, list any exceptions:
III.	The following factors were reviewed as we analyzed the data from the screening instrument:
	 Difficulty breaking words into smaller parts (syllables) (e.g., "baseball" can be pulled apart into "base" "ball" or "napkin" can be pulled apart into "nap" "kin") Difficulty identifying and manipulating sounds in syllables (e.g., "man" sounded out as /m//a//n/) Difficulty remembering the names of letters and recalling their corresponding sounds Difficulty decoding single words (reading single words in isolation) Difficulty spelling words the way they sound (phonetically) or remembering letter sequences in very common words seen often in print (e.g., "sed" for "said")
	As acresult of this screening process, our campus initiated the following for students that demonstrated "at risk" characteristics for dyslexia:
	Reviewed BOY, MOY, and EOY data
	Held parent conferences
	Proceeded with dyslexia assessment
	Created an intervention plan

Review of HB 1886 as it relates to dyslexia

- ► HB 1886 became effective September 1, 2017.
- Requires education service centers to employ a person licensed as a dyslexia therapist to help school districts with support and resources.
- Requires students to be screened, or tested for dyslexia at the end of kindergarten and first grade.
- ➤ Requires TEA to develop a list of training opportunities for educators regarding dyslexia that meet the requirements of Section 21.054 (b) regarding continuing education.

Question: Roel, who is this person at Region I?

Answer:

Thank you for your inquiry into House Bill 1886 created by the 85Th Texas Legislature. Several key components of the legislation will impact both the Education Service Center and local education agencies (LEA's) as we continue to support students identified with dyslexia. Currently, we are seeking additional clarification from both the Texas Education Agency and the State Board of Education regarding both the dyslexia specialist and early screeners. The adoption of each piece of legislation requires interpretation from the commissioner of education. As TEA provides more guidance on this issue, we will certain provide updates through our Instructional Leadership Network and the Dyslexia Coordinator meetings. The Texas Education Agency has advised the ESC that in January 2018, TEA will collaborate with the SBOE to address the identification of an approved list of screeners. In the meantime, we highly encourage you to continue to screen your kindergarten and first grade students for dyslexia and utilize the results to make individual decisions based on the needs of your students. At this time, our dyslexia specialists will continue to support districts served by Region One until we receive additional clarification from TEA regarding the dyslexia therapist. If you have any questions or need assistance, please contact our current dyslexia specialists listed below.

Roel Garza Dyslexia Specialist (956) 984-6182 rogarza@esc1.net

The Social Emotional Aspects of Dyslexia

Dyslexia can affect more than one's ability to read, spell, and write. Many times, because of the fact of not being able to do these things, one's self-esteem can be affected resulting in behaviors such as anger, frustration, avoidance, just to name a few. These behaviors not only challenge the student, but can impact everyone around them. This session brings an awareness to the socialemotional impacts of dyslexia and reviews some recommendations for coping.

Date: Saturday, January 27, 2018

Time: 8:30am – 11:30am

Location: Willacy Room Workshop #: 77034

Fee: \$ 50.00
